

Fortune will follow local health authorities' recommendations and instructions for the event and attendance. In addition, Fortune has partnered with International SOS for on-site support in following health and safety protocols:

- Only fully vaccinated guests (as per US CDC definition of fully vaccinated status) will be permitted to attend the events physically. Unvaccinated and/or partially vaccinated guests will attend virtually.
- Attendees should avoid immediate and direct contact including, but not limited to, handshaking and gestures that involve direct contact.
- Attendees must take a PCR (preferred) or rapid antigen test within 72 hours of the event start. Printed or digital proof of a negative test is required to attend the live event.
- Attendees must use Health Pass by CLEAR to ensure compliance to the full vaccination status requirement.
- Attendees must be asymptomatic on every day the event occurs.
- Attendees may be screened for symptoms and can be tested when needed by COVID 19 antigen test kits during the event, with International SOS using the US CDC process of antigen test result interpretation.
- Attendees will wear an appropriate face mask at all times.
- Attendees must immediately report any symptom that may appear during the event to the on-site medical team.
- In the event of a suspected case clinically (symptomatic) or a positive antigen test done onsite, isolation will be recommended pending referral for diagnostic testing with PCR at an appropriate facility. Close contact tracing will be conducted.
- Workers at the venue facility will wear masks at all times.
- Cleaning and disinfection of surfaces and areas of the event will be maintained on a regular cadence.
- The event venue will ensure proper ventilation and HVAC setup.
